SUMMARY

Frontend developer building responsive websites and dashboards with HTML, CSS, JavaScript, React, and Tailwind CSS. Built interactive projects including a theme-customizing landing page with Local Storage and a personal portfolio site with accessibility support. Currently learning Node.js, Express, and MongoDB to grow into full-stack (MERN) development.

SKILLS

Frontend: HTML, CSS, JavaScript, React, Tailwind CSS, SASS, Responsive Design

Backend (learning): Node.js, Express.js, MongoDB

Familiar with: TypeScript, REST APIs, JSON

Tools: Git, GitHub, VS Code, npm

PROJECTS

Responsive Admin Dashboard | HTML5, CSS3, Flexbox, CSS Grid, Responsive Design

- Built a fully responsive admin dashboard with custom sidebar navigation and dedicated pages for files, plans, profiles, projects, settings, and courses.
- Structured layouts with Flexbox and CSS Grid so the interface adapts from mobile to desktop.
- Wrote a modular custom CSS framework (framework.css, master.css) to keep styling consistent and reusable across pages.

Agency Landing Page: Theme Customizer | HTML5, CSS3, JavaScript, Local Storage, DOM Manipulation

- Built a responsive single-page agency landing page with a custom settings panel for changing theme colors, toggling background animations, and showing or hiding navigation.
- Saved user preferences with Local Storage and applied theme changes through CSS variables and DOM manipulation.
- Implemented scroll-triggered progress bar animations, a vanilla JavaScript image lightbox, and smooth-scrolling navigation.

Agency Landing Page: Mega-Menu & Pricing | HTML5, CSS3, JavaScript (ES6), CSS Animations, DOM Manipulation

- Built a responsive multi-section landing page with a mega-menu, article and gallery sections, testimonials, tiered pricing plans, and a discount request form.
- Used JavaScript to drive scroll-triggered skill progress bars, animated stat counters, and a real-time countdown timer.
- Created custom CSS @keyframes animations and floating image effects, with Flexbox and CSS Grid for responsive layouts.

Additional projects: ToDo List App (JavaScript); eCommerce search, category, and price filter functions (JavaScript); 3 custom login pages (React)

EDUCATION

Bachelor of Software Engineering | Expected graduation: 2028

College of Computer Science and Information, Sudan University of Science and Technology
